

Goals and Objectives of Most Recently Funded Project - Example

Using the table format below, list all goals and objectives for each year of the project. List the results for each objective. Refer to the RFA for definitions of goals and objectives.

NOTE: Objectives are specific, **MEASURABLE**, actionable, realistic, and timely (SMART) projections for outputs and outcomes. Creation of educational or training materials, project protocols, committees, and planning documents are examples of project activities; such activities should be described in the Project Plan section of the application. It is anticipated that most projects will have 1-2 goals per year with 1-3 objectives per goal.
