RFA VERSION HISTORY

Rev 11/17/16 RFA release

ARCHIVE

1. ABOUT CPRIT

The state of Texas has established the Cancer Prevention and Research Institute of Texas (CPRIT), which may issue up to \$3 billion in general obligation bonds to fund grants for cancer research and prevention.

CPRIT is charged by the Texas Legislature to do the following:

- Create and expedite innovation in the area of cancer research and in enhancing the potential for a medical or scientific breakthrough in the prevention of or cures for cancer;
- Attract, create, or expand research capabilities of public or private institutions of higher education and other public or private entities that will promote a substantial increase in cancer research and in the creation of high-quality new jobs in the state of Texas; and
- Develop and implement the Texas Cancer Plan.

1.1. Prevention Program Priorities

Legislation from the 83rd Texas Legislature requires that CPRIT's Oversight Committee establish program priorities on an annual basis. The priorities are intended to provide transparency in how the Oversight Committee directs the orientation of the agency's funding portfolio. The Prevention Program's principles and priorities will also guide CPRIT staff and the Prevention Review Council on the development and issuance of program-specific Requests for Applications (RFAs) and the evaluation of applications submitted in response to those RFAs.

Established Principles:

- Fund evidence-based interventions and their dissemination
- Support the prevention continuum of primary, secondary, and tertiary (includes survivorship) prevention interventions

Prevention Program Priorities

- Prioritize populations disproportionately affected by cancer incidence, mortality, or cancer risk prevalence
- Prioritize geographic areas of the state disproportionately affected by cancer incidence, mortality, or cancer risk prevalence
- Prioritize underserved populations

2. FUNDING OPPORTUNITY DESCRIPTION

2.1. Summary

The ultimate goals of the CPRIT Prevention Program are to reduce overall cancer incidence and mortality and to improve the lives of individuals who have survived or are living with cancer.

The ability to reduce cancer death rates depends in part on the application of currently available evidence-based technologies and strategies. CPRIT will foster the primary, secondary, and tertiary prevention of cancer in Texas by providing financial support for a wide variety of evidence-based risk reduction, early detection, and survivorship interventions.

This **Cancer Prevention Promotion and Navigation to Clinical Services (PN)** award mechanism solicits applications for health promotion that focus on education and outreach for prevention, early detection, and survivorship of cancer for the public. In addition, this RFA requires that projects assist participants in taking action by navigating them to 1 or more prevention services being promoted. The target audiences are the general population/priority populations as defined in this RFA. CPRIT's prevention grants are intended to fund prevention interventions that have a demonstrated evidence base and are culturally appropriate for the priority population. Education and awareness are key to changing personal behaviors that lead to cancer prevention, risk reduction, and early detection, but they must be followed by strategies that motivate, initiate, and sustain behavior change. Addressing and positively influencing local policy or system change can also lead to sustainable change in desired health behaviors.

2.2. Project Objectives

CPRIT seeks to fund projects that will provide 1 or more of the following:

- Increase the number of persons who improve their health behaviors related to the prevention of cancer, obtain recommended cancer screening tests or other preventive services, have cancers detected at earlier stages, and improve their quality of life if they are survivors of cancer;
- Reach and serve as many people as possible and assist them in obtaining access to preventive services;
- Seek to improve processes and systems for outreach, delivery of education, and timely referral to preventive services, including improving the cost-effectiveness of those systems; and

- Encourage traditional and nontraditional partnerships as well as leverage existing resources and dollars from other sources to address important knowledge gaps, increase access to services, and achieve desired behavior changes related to cancer prevention and control.

CPRIT expects measurable outcomes of supported activities, such as a significant and sustained change in public health behaviors (eg, getting vaccinated, quitting smoking, getting screened) and qualitative analysis of change/improvement to systems. Applicants must demonstrate how these outcomes will ultimately impact cancer incidence, mortality, morbidity, or quality of life.

2.3. Award Description

The Cancer Prevention Promotion and Navigation to Clinical Services RFA solicits applications for projects up to 36 months in duration that will deliver public education and outreach and navigation to cancer screening and preventive services in 1 or more of the following cancer prevention and control areas:

- Primary prevention (eg, delivery of vaccines that reduce the risk of cancer, evidence-based assessment and counseling services for behaviors established as increasing cancer risk);
- Secondary prevention (eg, risk-appropriate cancer screening guidelines for mammography, colonoscopy, Pap test);
- Tertiary prevention (eg, prevention and detection of new and recurrent cancers as well as interventions for the consequences of cancer and its treatment, such as physical rehabilitation/therapy, psychosocial interventions, survivor care plans, and palliative care services).

Priority will be given to applications that propose innovation in the delivery of evidence- and needs-based education and outreach efforts that have the potential to create demonstrable and sustainable change in behaviors that can prevent cancer or reduce the risk of cancer within a relatively short time, leverage existing resources, navigate participants to 1 or more of the preventive services being promoted, and can demonstrate the impact on public health behaviors by individuals taking preventive measures. CPRIT strongly encourages projects to include broad-based education on cancer risk reduction and healthy lifestyle as one component of the education curriculum.

It is anticipated that the development time for the proposed evidence-based program(s) would be minimal and that delivery of educational program(s) to public audiences would begin no later than 6 to 8 months after the contract effective date. In addition, sufficient time should be allowed for follow-up after completion of the educational program(s) and navigation to services to identify behavioral changes and participant outcomes.

The applicant should demonstrate knowledge of evidence-based education, outreach, and support strategies that include navigation to clinical services; however, CPRIT is seeking projects and partnerships that will apply evidence-based strategies in novel ways that support personal behavior change, thereby leading to cancer prevention, risk reduction, and early detection and to improvements in the quality of life for survivors.

Applicants should propose active, rather than passive, education and outreach strategies that are designed to reach, engage, and motivate people and that include plans for realistic action and sustainable behavior change. **Applicants must assist participants in obtaining the prevention interventions being promoted** by providing navigation services (assisting with scheduling screening, etc) and have a process for tracking participants to report on actions taken. For example, a breast cancer education project should include navigation to age- and risk-appropriate screening, follow-up with participants and/or professionals to confirm screening took place, and capture of the results of the screening test.

Under this RFA, CPRIT **will not** consider the following:

- **Projects focused solely on professional education and training.** In this cycle, stand-alone professional education programs will not be considered. The proposed project must include a public education and navigation component. However, professional education and training to accomplish the goals of sustained behavior change may be proposed as one component of the project.
- **Projects focused solely on public education.** Navigation to the clinical services being promoted and the subsequent follow-up after completion of navigation to services is a necessary component of this mechanism and must be fully addressed.
- **Projects focused solely on case management/patient navigation services.** Case management/patient navigation services must be paired with health promotion, education and outreach for prevention, early detection, and survivorship of cancer for the public. Furthermore, while navigation to the point of treatment of cancer is required when cancer

is discovered through a CPRIT-funded project, applications seeking funds to provide coordination of care while an individual is in treatment are not allowed under this RFA.

- **Payment for the delivery of clinical preventive services (eg, cost of vaccines or screenings) to the public.** However, applicants must assist participants in securing access to any preventive services that are being promoted. Applicants interested in including payment for the delivery of evidence-based services should submit applications under the Evidence-Based Cancer Prevention Services RFA.
- **Treatment of cancer.** While education on treatment options and access to treatment are important in reducing mortality from cancer, this award mechanism **will not address education on the treatment of cancer.** However, applicants must ensure that public education and outreach programs provide information on available resources that address treatment.
- **Prevention research.** Research will not be funded through this award mechanism. Applicants interested in research should review CPRIT's Academic Research RFAs (available at <http://www.cprit.texas.gov>).

2.4. Priorities

Types of Cancer: Applications addressing any cancer type(s) that are responsive to this RFA will be considered for funding. See [section 2.5](#) for specific areas of emphasis.

Priority Populations: Priority populations are subgroups that are underserved and disproportionately affected by cancer. While some insured individuals may fall within these definitions, insured populations are not the target of CPRIT's programs. CPRIT-funded efforts must address 1 or more of these priority populations:

- Underinsured and uninsured individuals;
- Geographically or culturally isolated populations;
- Medically unserved or underserved populations;
- Populations with low health literacy skills;
- Geographic regions or populations of the state with higher prevalence of cancer risk factors (eg, obesity, tobacco use, alcohol misuse, unhealthy eating, sedentary lifestyle);
- Racial, ethnic, and cultural minority populations; or

- Other populations with low screening rates, high incidence rates, and high mortality rates, focusing on individuals never before screened or who are significantly out of compliance with nationally recommended screening guidelines.

Geographic and Population Priority: For applications submitted in response to this announcement, at the programmatic level of review conducted by the Prevention Review Council (see [section 5.1](#)), priority will be given to projects that target geographic regions of the state and population subgroups that are not adequately covered by the current CPRIT Prevention project portfolio (see <http://www.cprit.texas.gov/prevention/resources-for-cancer-prevention-and-control/> and <http://www.cprit.texas.gov/funded-grants/>).

2.5. Specific Areas of Emphasis

Applications that propose delivering ANY type of evidence-based preventive service or education and outreach program that includes navigation to services that is responsive to this RFA will be considered. However, CPRIT has identified the following areas of emphasis for this cycle of awards.

Primary Prevention
Tobacco Prevention and Control
<ul style="list-style-type: none"> • Vulnerable and high-risk populations, including people with mental illness, history of substance abuse, youth, and pregnant women, that have higher tobacco usage rates than the general population.
<ul style="list-style-type: none"> • Areas that have higher smoking rates per capita than other areas of the state. Public Health Regions (PHR) 4, 5, and 9 have significantly higher tobacco use among adults than in other regions of the state.
HPV Vaccination
<ul style="list-style-type: none"> • Increasing access to, delivery of, and completion of the HPV vaccine regimen to males and females through evidence-based intervention efforts in all areas of the state.¹

Liver Cancer
<ul style="list-style-type: none"> Decreasing disparities in incidence and mortality rates for hepatocellular cancer by increasing the provision of vaccination and screening for hepatitis B virus (HBV) and screening for hepatitis C virus (HCV).
<ul style="list-style-type: none"> Screening for HBV infection and HCV infection in populations at high risk of infection and one-time screening for HCV infection in adults born between 1945 and 1965.
<ul style="list-style-type: none"> Increasing screening rates in PHR 8 and 11 where incidence rates are highest; mortality rates are highest in PHR 10 and 11.²
<u>Secondary Prevention - Screening and Early Detection Services</u>
Colorectal Cancer
<ul style="list-style-type: none"> Decreasing disparities in incidence and mortality rates of colorectal cancer in racial/ethnic populations. Blacks have the highest incidence and mortality rates, followed by non-Hispanic Whites and Hispanics.²
<ul style="list-style-type: none"> Increasing screening/detection rates in PHR 2, 4, and 5, where the highest rates of cancer incidence and mortality are found. Decreasing incidence and mortality rates in nonmetropolitan counties. Incidence and mortality rates are higher in nonmetropolitan counties compared with metropolitan counties.²
Breast Cancer
<ul style="list-style-type: none"> Decreasing disparities in incidence and mortality rates of breast cancer in racial/ethnic populations. The mortality rate is significantly higher in Blacks than in other populations.²
<ul style="list-style-type: none"> Increasing screening/detection rates in medically underserved areas of the state.
Cervical Cancer
<ul style="list-style-type: none"> Decreasing disparities in incidence and mortality rates of cervical cancer in racial/ethnic populations. Hispanics have the highest incidence rates while Blacks have the highest mortality rates.
<ul style="list-style-type: none"> Increasing screening/detection rates for women in Texas-Mexico border counties. Women in these counties have a 30% higher cervical cancer mortality rate than women in nonborder counties.²
<u>Tertiary Prevention – Survivorship Services</u>
<ul style="list-style-type: none"> Preventing secondary cancers and recurrence of cancer through evidence-based interventions.
<ul style="list-style-type: none"> Improving quality of life of survivors of cancer by managing the after effects of cancer, including the use of survivorship care plans.

2.6. Outcome Metrics

The applicant is required to describe how the goals and objectives for each year of the project as well as the final outcomes will be measured. The applicant should provide a clear and appropriate plan for data collection and interpretation of results to report against goals and objectives. Interim or output measures that are associated with the final outcome measures should be identified and will serve as a measure of program effectiveness and public health impact. Applicants are required to clearly describe their assessment and evaluation methodology. **Baseline data for each measure proposed are required.** In addition, applicants should describe how funds from the CPRIT grant will improve outcomes over baseline. If the applicant is not providing baseline data for a measure, the applicant must provide a well-justified explanation and describe clear plans and method(s) of measurement used to collect the data necessary to establish a baseline.

Applicants must evaluate changes in participants' knowledge and behavior/performance after the program. Applicants are required to clearly describe their assessment and evaluation methodology and to provide baseline data describing how funds from the CPRIT grant will improve outcomes over baseline. In the case where no baseline data exist for the priority population, the applicant must present clear plans and describe method(s) of measurement used to collect the data necessary to establish a baseline at the beginning of the proposed project. Similarly, applicants with previously or currently funded CPRIT projects are required to provide a summary of the project results and how the current application builds on the previous work or addresses new areas of cancer prevention and control services. All projects are **required** to follow up and identify the effectiveness of the proposed intervention (eg, impact of system changes, adherence to screening guidelines, number of participants who took action and received primary prevention or screening services).

Reporting Requirements

Funded projects are required to report quantitative output and outcome metrics (as appropriate for each project) through the submission of quarterly progress reports, annual reports, and a final report.

- Quarterly progress report sections include, but are not limited to the following:
 - Summary page, including narrative on project progress (required);
 - Services, other than clinical services, provided to the public/professionals;

- Actions taken by people/professionals as a result of education or training;
 - Clinical services provided (county of residence of client is required); and
 - Precursors and cancers detected.
- Annual and Final progress report sections include, but are not limited to the following:
 - Key accomplishments, including qualitative analysis of policy change and/or lasting systems change and;
 - Progress toward goals and objectives, including percentage increase over baseline in provision of age- and risk-appropriate education and navigation services to eligible individuals in a defined service area; for example:
 - Percentage increase over baseline in number of people served;
 - Percentage increase over baseline in number of education and navigation services provided;
 - Percentage increase over baseline in cancers and precancers detected, if applicable;
 - Percentage increase in early-stage cancer diagnoses in a defined service area, if applicable.
 - Materials produced and publications;
 - Economic impact of the project.

2.7. Eligibility

- The applicant must be a Texas-based entity, such as a community-based organization, health institution, government organization, public or private company, college or university, or academic health institution.
- The applicant is eligible solely for the grant mechanism specified by the RFA under which the grant application was submitted.
- The designated Program Director (PD) will be responsible for the overall performance of the funded project. The PD must have relevant education and management experience and must reside in Texas during the project performance time.
- The evaluation of the project must be headed by a professional who has demonstrated expertise in the field and who resides in Texas during the time that the project is conducted.

- The applicant may submit more than 1 application, but each application must be for distinctly different services without overlap in the services provided. Applicants who do not meet this criterion will have all applications administratively withdrawn without peer review.
- If an organization has a current CPRIT grant that is the same or similar to the prevention intervention being proposed, the applicant must explain how the projects are nonduplicative or complementary.
- If the applicant or a partner is an existing DSHS contractor, CPRIT funds may not be used as a match, and the application must explain how this grant complements or leverages existing state and federal funds. DSHS contractors who also receive CPRIT funds must be in compliance with and fulfill all contractual obligations within CPRIT. CPRIT and DSHS reserve the right to discuss the contractual standing of any contractor receiving funds from both entities.
- Collaborations are permitted and encouraged, and collaborators may or may not reside in Texas. However, collaborators who do not reside in Texas are not eligible to receive CPRIT funds. Subcontracting and collaborating organizations may include public, not-for-profit, and for-profit entities. Such entities may be located outside of the state of Texas, but non-Texas-based organizations are not eligible to receive CPRIT funds.
- An applicant organization is eligible to receive a grant award only if the applicant certifies that the applicant organization, including the PD, any senior member or key personnel listed on the grant application, or any officer or director of the grant applicant's organization (or any person related to 1 or more of these individuals within the second degree of consanguinity or affinity), has not made and will not make a contribution to CPRIT or to any foundation created to benefit CPRIT.
- An applicant is not eligible to receive a CPRIT grant award if the applicant PD, any senior member or key personnel listed on the grant application, or any officer or director of the grant applicant's organization or institution is related to a CPRIT Oversight Committee member.
- The applicant must report whether the applicant organization, the PD, or other individuals who contribute to the execution of the proposed project in a substantive, measurable way, (whether slated to receive salary or compensation under the grant award or not), are currently ineligible to receive federal grant funds because of scientific misconduct or

fraud or have had a grant terminated for cause within 5 years prior to the submission date of the grant application.

- CPRIT grants will be awarded by contract to successful applicants. CPRIT grants are funded on a reimbursement-only basis. Certain contractual requirements are mandated by Texas law or by administrative rules. Although applicants need not demonstrate the ability to comply with these contractual requirements at the time the application is submitted, applicants should make themselves aware of these standards before submitting a grant application. Significant issues addressed by the CPRIT contract are listed in [section 6](#). All statutory provisions and relevant administrative rules can be found at <http://www.cprit.texas.gov>.

2.8. Resubmission Policy

- Two **resubmissions** are permitted. An application is considered a resubmission if the proposed project is the same project as presented in the original submission. A change in the identity of the PD for a project or a change of title for a project that was previously submitted to CPRIT does not constitute a new application; the application would be considered a resubmission.
- Applicants who choose to resubmit should carefully consider the reasons for lack of prior success. Applications that received overall numerical scores of 5 or higher are likely to need considerable attention. All resubmitted applications should be carefully reconstructed; a simple revision of the prior application with editorial or technical changes is not sufficient, and applicants are advised not to direct reviewers to such modest changes. A 1-page summary of the approach to the resubmission should be included. Resubmitted applications may be assigned to reviewers who did not review the original submission. Reviewers of resubmissions are asked to assess whether the resubmission adequately addresses critiques from the previous review. **Applicants should note that addressing previous critiques is advisable; however, it does not guarantee the success of the resubmission.** All resubmitted applications must conform to the structure and guidelines outlined in this RFA.

2.9. Continuation/Expansion Policy

- For the FY17.2 application receipt cycle, instead of a separate Competitive Continuation/Expansion RFA, an opportunity to apply for a continuation/expansion award is included with each eligible award mechanism. Therefore, a grant recipient that has previously been awarded grant funding from CPRIT may submit an application under this mechanism to be considered for a continuation/expansion grant. The eligibility criteria described in [section 2.7](#) also apply for a continuation/expansion grant. Before submitting an application for this award, applicants must consult with the Prevention Program Office (see [section 7.2](#)) to determine whether it is appropriate for their organization to seek continuation/expansion funding at this time.
- Continuation/Expansion grants are intended to fund continuation or expansion of currently or previously funded projects that have demonstrated exemplary success, as evidenced by progress reports and project evaluations, and desire to further enhance their impact on priority populations. Detailed descriptions of **results, barriers, outcomes, and impact of the currently or previously funded project are required** (see outline of Continuation/Expansion Summary, section [4.4.9.1](#)).
- Proposed continuation/expansion projects should NOT be new projects but should closely follow the intent and core elements of the currently or previously funded project. Established infrastructure/processes and fully described prior project results are required. Improvements and expansion (eg, new geographic area, additional services, new populations) are strongly encouraged but will require justification. Expansion of current projects into geographic areas not well served by the CPRIT portfolio (see maps at <http://www.cprit.texas.gov/prevention/cprit-portfolio-maps/>), especially rural areas or subpopulations of urban areas that are not currently being served, will receive priority consideration.
- CPRIT expects measurable outcomes of supported activities, such as a significant increase over baseline (for the proposed service area). It is expected that baselines will have already been established and that continued improvement over baseline is demonstrated in the current application. However, in the case of a proposed expansion where no baseline data exist for the priority population, the applicant must present clear plans and describe method(s) of measurement used to collect the data necessary to

establish a baseline. Applicants must demonstrate how these outcomes will ultimately impact cancer incidence, mortality, morbidity, or quality of life.

- CPRIT also expects that applications for continuation **will not** require startup time, that applicants can demonstrate that they have overcome barriers encountered, and that applicants have identified **lasting systems changes** that improve results, efficiency, and sustainability. Leveraging of resources and plans for dissemination are expected and should be well described.

2.10. Funding Information

Applicants may request any amount of funding up to a maximum of \$400,000 in total funding over a maximum of 36 months for new or continuation/expansion projects. Grant funds may be used to pay for salary and benefits, project supplies, equipment, costs for outreach and education of populations, and travel of project personnel to project site(s). Grantees may request funds for travel for 2 project staff to attend CPRIT's biennial conference.

State law limits the amount of award funding that may be spent on indirect costs to no more than 5% of the **total** award amount.

The budget should be proportional to the number of individuals receiving programs and services, and a significant proportion of funds is expected to be used for program and service delivery as opposed to program development. In addition, CPRIT seeks to fill gaps in funding rather than replace existing funding, supplant funds that would normally be expended by the applicant's organization, or make up for funding reductions from other sources. CPRIT does not provide support for projects when funds are readily available from other sources. Furthermore, CPRIT funds may not be used for any costs under this award that should be billed to any other funding source.

3. KEY DATES

RFA

RFA release November 17, 2016

Application

Online application opens December 1, 2016, 7 AM central time

Application due March 2, 2017, 3 PM central time

Application review	June 2017
Award	
Award notification	August 2017
Anticipated start date	September 2017

Applicants will be notified of peer review panel assignment prior to the peer review meeting dates.

4. APPLICATION SUBMISSION GUIDELINES

4.1. *Instructions for Applicants* document

It is imperative that applicants read the accompanying instructions document for this RFA (<https://CPRITGrants.org>). Requirements may have changed from previous versions.

4.2. Online Application Receipt System

Applications must be submitted via the CPRIT Application Receipt System (CARS) (<https://CPRITGrants.org>). **Only applications submitted through this portal will be considered eligible for review.** The PD must create a user account in the system to start and submit an application. The Co-PD, if applicable, must also create a user account to participate in the application. Furthermore, the Application Signing Official (a person authorized to sign and submit the application for the organization) and the Grants Contract/Office of Sponsored Projects Official (an individual who will help manage the grant contract if an award is made) also must create a user account in CARS. Applications will be accepted beginning at 7 AM central time on December 1, 2016, and must be submitted by 3 PM central time on March 2, 2017. Detailed instructions for submitting an application are in the *Instructions for Applicants* document, posted on CARS. **Submission of an application is considered an acceptance of the terms and conditions of the RFA.**

4.3. Submission Deadline Extension

The submission deadline may be extended for 1 or more grant applications upon a showing of good cause. All requests for extension of the submission deadline must be submitted via email to the CPRIT HelpDesk. Submission deadline extensions, including the reason for the extension, will be documented as part of the grant review process records.

4.4. Application Components

Applicants are advised to follow all instructions to ensure accurate and complete submission of all components of the application. Please refer to the *Instructions for Applicants* document for details, which will be available when the application receipt system opens. **Submissions that are missing 1 or more components or do not meet the eligibility requirements will be administratively withdrawn without review.**

4.4.1. Abstract and Significance (5,000 characters)

Clearly explain the problem(s) to be addressed, the approach(es) to the solution, and how the application is responsive to this RFA. In the event that the project is funded, the abstract will be made public; therefore, no proprietary information should be included in this statement. Initial compliance decisions are based in part upon review of this statement.

The recommended abstract format is as follows (use headings as outlined below):

- **Need:** Include a description of need in the specific service area. Include rates of incidence, mortality, and screening in the service area compared to overall Texas rates. Describe barriers, plans to overcome these barriers, and the priority population to be served.
- **Overall Project Strategy:** Describe the project and how it will address the identified need. Clearly explain what the project is and what it will specifically do, including the education, outreach, and navigation services to be provided, and the process/system for delivery of education, outreach, and navigation services to the priority population.
- **Specific Goals:** State specifically the overall goals of the proposed project; include the estimated overall numbers of people (public and/or professionals) reached and people (public and/or professionals) served.
- **Innovation:** Describe the creative components of the proposed project and how it differs from current programs or education, outreach, and navigation services being provided.
- **Significance and Impact:** Explain how the proposed project, if successful, will have a unique and major impact on cancer prevention and control for the population proposed to be served and for the state of Texas.

4.4.2. Goals and Objectives (700 characters each)

List major outcome goals and **measurable** objectives for each year of the project. Do not include process objectives; these should be included in the project plan only. The maximum number is 4 outcome goals with 3 objectives each. Projects will be evaluated annually on the progress toward outcome goals and objectives. See [Appendix B](#) for instructions on writing outcome goals and objectives.

A baseline and method(s) of measurement are required for each objective. Provide both raw numbers and percent changes for the baseline and target. If a baseline has not yet been defined, applicants are required to explain plans to establish baseline and describe method(s) of measurement.

4.4.3. Project Timeline (2 pages)

Provide a project timeline for project activities that includes deliverables and dates. Use Years 1, 2, 3, and Months 1, 2, 3, etc, as applicable instead of specific months or years (eg, Year 1, Months 3-5, not 2017, March-May).

4.4.4. Project Plan (15 pages; fewer pages permissible)

The required project plan format follows. Applicants must use the headings outlined below.

Background: Briefly present the rationale for the proposed project, emphasizing the pressing problem in cancer prevention that will be addressed and how the project will have a major impact on changing peoples' behaviors to prevent cancer, reduce the risk of cancer, or improve the quality of life for survivors within a relatively short time frame. Describe creative components of the proposed project. Clearly demonstrate the ability to complete the proposed project and describe how results will be improved over baseline knowledge and personal behaviors. Clearly demonstrate the ability to reach the priority population. Describe the geographic region of the state that the project will serve; maps are appreciated.

Goals and Objectives: Process objectives should be included in the project plan. Outcome goals and objectives will be entered in separate fields in CARS and need not be provided in the project plan. However, if desired, outcome goals and objectives may be fully repeated or briefly summarized here. See [Appendix B](#) for instructions on writing goals and objectives.

Components of the Project: Clearly describe the need, education and outreach design and delivery methods, navigation to preventive services, and evidence base (provide references) for the project as well as instructors and anticipated results. Be explicit about the base of evidence and any necessary adaptations for the proposed project. Describe why this project is nonduplicative, creative, or unique. If an organization has a current CPRIT grant on the same or similar prevention intervention being proposed, the applicant must explain how the projects are nonduplicative or complementary.

Clearly demonstrate the ability to provide the proposed education, outreach, and navigation services, and describe how results will be improved over baseline and the ability to reach the priority population. Applicants must also clearly describe plans to ensure access to treatment services should cancer be detected.

Evaluation Strategy: A strong commitment to evaluation of the project is required. Describe the impact on outcome measures and interim output measures as outlined in [section 2.6](#). Describe the plan for outcome and output measurements, including data collection and management methods, data analyses, and anticipated results. Evaluation and reporting of results should be headed by a professional who has demonstrated expertise in the field. If needed, applicants may want to consider seeking expertise at Texas-based academic cancer centers, schools/programs of public health, prevention research centers, or the like. Applicants should budget accordingly for the evaluation activity and should involve that professional during grant application preparation to ensure, among other things, that the evaluation plan is linked to the proposed goals and objectives.

Organizational Qualifications and Capabilities: Describe the organization and its track record and success in providing programs and services. Describe the role and qualifications of the key collaborators/partners in the project. Include information on the organization's financial stability and viability. To ensure access to preventive services and reporting of services outcomes, applicants should demonstrate that they have provider partnerships and agreements (via memoranda of understanding) or commitments (via letters of commitment) in place.

Integration and Capacity Building: CPRIT funds projects that target the unmet needs not sufficiently covered by other funding sources, and full maintenance of the project may not be feasible. This is especially the case when the project involves the delivery of clinical services. Educational and other less costly interventions may be more readily sustained. Full maintenance

of a project, the ability of the grantee's setting or community to continue to deliver the health benefits of the intervention as funded is not required; however, efforts toward maintenance should be described.

It is expected that steps toward integration and capacity building for components of the project will be taken and plans for such be fully described in the application. *Integration* is defined as the extent the evidence-based intervention is integrated within the culture of the grantee's setting or community through policies and practice. *Capacity building* is any activity (eg, training, identification of alternative resources, building internal assets) that builds durable resources and enables the grantee's setting or community to continue the delivery of some or all components of the evidence-based intervention.

Elements of integration and capacity building may include, but are not limited to, the following:

- Developing ownership, administrative networks, and formal engagements with stakeholders;
- Developing processes for each practice/location to incorporate services into its structure beyond project funding;
- Identifying and training of diverse resources (human, financial, material, and technological);
- Implementing policies to improve effectiveness and efficiency (including cost-effectiveness) of systems.

Dissemination and Scalability (Expansion): Dissemination of project results and outcomes, including barriers encountered and successes achieved, is critical to building the evidence base for cancer prevention and control efforts in the state. Dissemination methods may include, but are not limited to, presentations, publications, abstract submissions, and professional journal articles, etc.

Describe how the project lends itself to dissemination to or application by other communities and/or organizations in the state or expansion in the same communities.

While scalability of programs is desirable, some programs may have unique resources and may not lend themselves to replication by others. However, some components of the project may lend themselves to modification and replication. Discuss whether the program lends itself to scalability and expansion by others.

4.4.5. People Reached (Indirect Contact)

Provide the estimated overall number of people (members of the public and professionals) to be reached by the funded project. The applicant is required to itemize separately the types of indirect noninteractive education and outreach activities, with estimates, that led to the calculation of the overall estimates provided. Refer to [Appendix A](#) for definitions.

4.4.6. People Served (Direct Contact)

Provide the estimated overall number of direct services delivered to members of the public and to professionals by the funded project. The applicant is required to itemize separately the education, navigation, and clinical activities/services, with estimates, that led to the calculation of the overall estimate provided. Refer to [Appendix A](#) for definitions.

4.4.7. References

Provide a concise and relevant list of references cited for the application. The successful applicant will provide referenced evidence of need and literature support for the proposed education and outreach methods.

4.4.8. Resubmission Summary

Use the template provided on the CARS (<https://CPRITGrants.org>). Describe the approach to the resubmission and how reviewers' comments were addressed. Clearly indicate to reviewers how the application has been improved in response to the critiques. Refer the reviewers to specific sections of other documents in the application where further detail on the points in question may be found. When a resubmission is evaluated, responsiveness to previous critiques is assessed. The summary statement of the original application review, if previously prepared, will be automatically appended to the resubmission; the applicant is not responsible for providing this document.

4.4.9. Continuation/Expansion Application Documents

If the project proposed is being submitted for a continuation/expansion grant, the additional documents in [section 4.4.9.1](#) and [section 4.4.9.2](#) are required.

4.4.9.1 Continuation/Expansion Summary (2 pages)

Upload a summary that outlines the progress made with the original, and if applicable, most recently funded CPRIT award (for projects which have received multiple awards) and outlines

the proposed use of continuation/expansion funding and the resulting value for Texas. Applicants must describe and demonstrate that appropriate/adequate progress has been made on the original and/or most recently funded award to warrant further funding.

The continuation/expansion summary must include information for the original funded project, the most recently funded project (if different from the original project, for those projects which have received multiple CPRIT awards), and the proposed continuation/expansion project. Please note that a different set of reviewers from those assigned to the previously funded application may evaluate this application. Applicants should make it easy for reviewers to compare the original project and the most recently funded project (again, only if different from the original project) with the proposed continuation/expansion project.

Describe how the project has evolved from the original project. In the description include a discussion of the following:

- The evidence-based intervention: Describe its purpose and how it was implemented in the priority population. Describe any adaptations made for the population served.
- Project Results and Outcomes: Address how the need for the evidence-based service was met by describing qualitative results, quantitative results, and outcomes of the project(s). Explain any barriers or obstacles encountered and strategies used to overcome these.
- Integration and Capacity Building: Describe steps taken toward integration and capacity building for components of the projects.
- Dissemination/Adaptation: Describe how project results were disseminated or plans for future dissemination of results.

4.4.9.2 Goal and Objectives for Most Recently Funded Project (Continuation/Expansion Applications Only)

If a continuation/expansion application is being submitted, goals and objectives must be completed for the original or the most recently funded project. The original project is defined as the first funded project upon which this application is based. If the project has received precisely one CPRIT award, then the original project is also the most recently funded project. If the project has received multiple CPRIT awards, the original project is not the most recently funded project.

If the continuation/expansion application is for continuation of an original project, enter the goals and objectives for the original funded project, and progress made toward each goal and objective,

in the **Goals and Objectives of Most Recently Funded Project template** form provided on the CARS (<https://CPRITGrants.org>).

If the continuation/expansion application is for a subsequent project (not the original project), complete the **CPRIT Grants Summary template** (see [section 4.4.10](#)) for the original project, regardless of the PD or Co-PD of the original project (who may or may not have changed since the original project). **In addition**, enter the goals and objectives for only the most recently funded project, and progress made toward each goal and objective, in the **Goals and Objectives of Most Recently Funded Project template** form provided on the CARS (<https://CPRITGrants.org>).

When completing the form, provide an explanation if goals and objectives were not fully met. Include the number and type of each clinical, education, and navigation service delivered as well as the percent change from the initial baseline. If the baseline was 0, report against the baseline that was established during the original project.

4.4.10. CPRIT Grants Summary

Use the template provided on the CARS (<https://CPRITGrants.org>). Provide a description of the progress or final results of **all** CPRIT-funded projects of the PD or Co-PD, regardless of their connection to this application. Indicate how the current application builds on the previous work or addresses new areas of cancer prevention and control services. Applications that are missing this document and for which CPRIT records show a PD and/or Co-PD with previous or current CPRIT funds will be administratively withdrawn.

4.4.11. Budget and Justification

Provide a brief outline and detailed justification of the budget for the entire proposed period of support, including salaries and benefits, travel, equipment, supplies, contractual expenses, services delivery, and other expenses. CPRIT funds will be distributed on a reimbursement basis. Applications requesting more than the maximum allowed cost (total costs) as specified in [section 2.10](#) will be administratively withdrawn.

- **Average Cost of Services:** The average cost of services will be automatically calculated from the total cost of the project divided by the total number of services (refer to [Appendix A](#)). A significant proportion of funds is expected to be used for program delivery as opposed to program development and organizational infrastructure.

- **Personnel:** The individual salary cap for CPRIT awards is \$200,000 per year. Describe the source of funding for all project personnel where CPRIT funds are not requested.
- **Travel:** PDs and related project staff are expected to attend CPRIT's conference. CPRIT funds may be used to send up to 2 people to the conference.
- **Equipment:** Equipment having a useful life of more than 1 year and an acquisition cost of \$5,000 or more per unit must be specifically approved by CPRIT. An applicant does not need to seek this approval prior to submitting the application. Justification must be provided for why funding for this equipment cannot be found elsewhere; CPRIT funding should not supplant existing funds. Cost sharing of equipment purchases is strongly encouraged.
- **Services Costs:** CPRIT reimburses for services using Medicare reimbursement rates. Describe the source of funding for all services where CPRIT funds are not requested.
- **Other Expenses**
 - **Incentives:** Use of incentives or positive rewards to change or elicit behavior is allowed; however, incentives may only be used based on strong evidence of their effectiveness for the purpose and in the priority population identified by the applicant. CPRIT will not fund cash incentives. The maximum dollar value allowed for an incentive per person, per activity or session, is \$25.
 - CPRIT does not allow recovery of costs related to tests that have not been recommended by the USPSTF. In several cases (eg, breast self-exams, clinical breast exams, PSA tests), the Task Force has concluded there is not enough evidence available to draw reliable conclusions about the additional benefits and harms of these tests (<https://www.uspreventiveservicestaskforce.org/>).
 - **Costs Not Related to Cancer Prevention and Control:** CPRIT does not allow recovery of any costs for services not related to cancer (eg, health physicals, HIV testing).
- **Indirect/Shared Costs:** Texas law limits the amount of grant funds that may be spent on indirect/shared costs to no more than 5% of the total award amount (5.263% of the direct costs). Guidance regarding indirect cost recovery can be found in [CPRIT's Administrative Rules](#).

4.4.12. Current and Pending Support and Sources of Funding

Use the template provided on the CARS (<https://CPRITGrants.org>). Describe the funding source and duration of all current and pending support for the proposed project, including a capitalization table that reflects private investors, if any. For continuation/expansion applications, information for the original/most recently funded project need not be included here.

4.4.13. Biographical Sketches

The designated PD will be responsible for the overall performance of the funded project and must have relevant education and management experience. The PD/Co-PD(s) must provide a biographical sketch that describes his or her education and training, professional experience, awards and honors, and publications and/or involvement in programs relevant to cancer prevention and/or service delivery.

The evaluation professional must provide a biographical sketch.

Up to 3 additional biographical sketches for key personnel may be provided. Each biographical sketch must not exceed 2 pages and should use the “Prevention Programs: Biographical Sketch” template provided on the CARS (<https://CPRITGrants.org>).

Only biographical sketches will be accepted; do not submit resumes and CVs.

4.4.14. Collaborating Organizations

List all key participating organizations that will partner with the applicant organization to provide 1 or more components essential to the success of the program (eg, evaluation, clinical services, recruitment to screening).

4.4.15. Letters of Commitment (10 pages)

Applicants should provide letters of commitment and/or memoranda of understanding from community organizations, key faculty, or any other component essential to the success of the program.

5. APPLICATION REVIEW

5.1. Review Process Overview

All eligible applications will be reviewed using a 2-stage peer review process: (1) evaluation of applications by peer review panels and (2) prioritization of grant applications by the Prevention

Review Council. In the first stage, applications will be evaluated by an independent review panel using the criteria listed below. In the second stage, applications judged to be meritorious by review panels will be evaluated by the Prevention Review Council and recommended for funding based on comparisons with applications from all of the review panels and programmatic priorities. Programmatic considerations may include, but are not limited to, geographic distribution, cancer type, population served, and type of program or service. The scores are only 1 factor considered during programmatic review. At the programmatic level of review, priority will be given to proposed projects that target geographic regions of the state or population subgroups that are not well represented in the current CPRIT Prevention project portfolio.

Applications approved by Review Council will be forwarded to the CPRIT Program Integration Committee (PIC) for review. The PIC will consider factors including program priorities set by the Oversight Committee, portfolio balance across programs, and available funding. The CPRIT Oversight Committee will vote to approve each grant award recommendation made by the PIC. The grant award recommendations will be presented at an open meeting of the Oversight Committee and must be approved by two-thirds of the Oversight Committee members present and eligible to vote. The review process is described more fully in CPRIT's Administrative Rules, [chapter 703, sections 703.6 to 703.8](#).

Each stage of application review is conducted confidentially, and all CPRIT Peer Review Panel members, Review Council members, PIC members, CPRIT employees, and Oversight Committee members with access to grant application information are required to sign nondisclosure statements regarding the contents of the applications. All technological and scientific information included in the application is protected from public disclosure pursuant to Health and Safety Code §102.262(b).

Individuals directly involved with the review process operate under strict conflict-of-interest prohibitions. All CPRIT Peer Review Panel members and Review Council members are non-Texas residents.

An applicant will be notified regarding the peer review panel assigned to review the grant application. Peer Review Panel members are listed by panel on CPRIT's website. **By submitting a grant application, the applicant agrees and understands that the only basis for reconsideration of a grant application is limited to an undisclosed Conflict of Interest as set forth in CPRIT's Administrative Rules, [chapter 703, section 703.9](#).**

Communication regarding the substance of a pending application is prohibited between the grant applicant (or someone on the grant applicant's behalf) and the following individuals: an Oversight Committee Member, a PIC Member, a Review Panel member, or a Review Council member. Applicants should note that the CPRIT PIC comprises the CPRIT Chief Executive Officer, the Chief Scientific Officer, the Chief Prevention and Communications Officer, the Chief Product Development Officer, and the Commissioner of State Health Services. The prohibition on communication begins on the first day that grant applications for the particular grant mechanism are accepted by CPRIT and extends until the grant applicant receives notice regarding a final decision on the grant application. The prohibition on communication does not apply to the time period when preapplications or letters of interest are accepted. Intentional, serious, or frequent violations of this rule may result in the disqualification of the grant application from further consideration for a grant award.

5.2. Review Criteria

Peer review of applications will be based on primary scored criteria and secondary unscored criteria, identified below. Review panels consisting of experts in the field and advocates will evaluate and score each primary criterion and subsequently assign an overall score that reflects an overall assessment of the application. The overall evaluation score will not be an average of the scores of individual criteria; rather, it will reflect the reviewers' overall impression of the application and responsiveness to the RFA priorities.

5.3. Primary Evaluation Criteria

Impact and Innovation

- Does clear evidence exist of an important need for this public education, and can that education effectively address the need? Are the goals and priorities of the project responsive to the RFA?
- Does the proposed project demonstrate creativity, ingenuity, resourcefulness, or imagination? Does it take evidence-based interventions and apply them in innovative ways, going beyond “doing what has always been done” to explore new partnerships, new audiences, or improvements to systems? For continuation/expansion projects, does the proposed project build on its initial results (baseline)? Does it go beyond the initial project to address what the applicant has learned or explore new partnerships, new audiences, or improvements to systems?

- Does the program address known gaps in cancer prevention education and access to preventive services and avoid duplication of effort?
- If applicable, have collaborative partners demonstrated that the collaborative effort will provide a greater impact on cancer prevention and control than each individual organization's effort separately?
- Will the project reach and serve an appropriate number of people based on the budget submitted?

Project Strategy and Feasibility

- Does the proposed project provide education and outreach programs specified in the RFA?
- Does the project provide the required access or navigation to preventive services following educational activities? Are partnerships with service providers clearly and convincingly described?
- Are the overall program approach and strategy clearly described and supported by established theory and practice as well as evidence-based interventions? Are the base of evidence and any necessary adaptations clearly explained and referenced?
- Are the proposed objectives and activities feasible within the duration of the award? Has the applicant convincingly demonstrated the short- and long-term impacts of the project?
- Is the priority population as well as culturally appropriate methods to reach the priority population clearly described? Are barriers for the population clearly described, and are plans to provide culturally appropriate education to overcome these barriers clearly addressed?
- Does the program leverage partners and resources to maximize the reach of the program proposed? Does the program leverage and complement other state, federal, and nonprofit grants?

Outcomes Evaluation

- Are specific goals and measurable objectives for each year of the project provided?
- Are the proposed outcome measures appropriate for the project, and are the expected changes significant?
- Does the application provide a clear and appropriate plan for data collection and management and data analyses?

- Are clear baseline data provided for the priority population, or are clear plans and methods of measurements included to collect baseline data at the beginning of the proposed project?
- If an evidence-based intervention is being adapted in a population where it has not been tried/tested, are plans for evaluation of barriers, effectiveness, and fidelity to the model described?
- Is the qualitative analysis of planned policy or system changes described?

Organizational Qualifications and Capabilities

- Do the organization and its collaborators/partners demonstrate the ability to provide the proposed preventive services? Does the described role of each collaborating organization make it clear that each organization adds value to the project and is committed to working together to implement the project?
- Have the appropriate personnel been recruited to implement, evaluate, and complete the project?
- Is the organization structurally and financially stable and viable?

Integration and Capacity Building

- Does the applicant describe steps that will be taken and components of the project that will be integrated into the organization through policies and practices?
- Does the applicant describe steps that will be taken or components of the project that will remain (eg, trained personnel, identification of alternative resources, building internal assets) to continue the delivery of **some or all** components of the evidence-based intervention once CPRIT funding ends?

5.4. Secondary Evaluation Criteria

Secondary criteria contribute to the global score assigned to the application. Lack of information or clarity on these criteria may result in a lower global score. Included in the secondary evaluation criteria are the following:

Budget

- Is the budget appropriate and reasonable for the scope and services of the proposed work?
- Is the cost per person served appropriate and reasonable?

- Is the proportion of the funds allocated for direct services reasonable?
- Is the project a good investment of Texas public funds?

Dissemination and Scalability

- Are plans for dissemination of the project's results (both positive and negative) clearly described?
- Some programs may have unique resources and may not lend themselves to replication by others. If applicable, does the applicant describe a plan for scalability/expansion of all or some components of the project by others in the state?

6. AWARD ADMINISTRATION

Texas law requires that CPRIT grant awards be made by contract between the applicant and CPRIT. CPRIT grant awards are made to institutions or organizations, not to individuals. Award contract negotiation and execution will commence once the CPRIT Oversight Committee has approved an application for a grant award. CPRIT may require, as a condition of receiving a grant award, that the grant recipient use CPRIT's electronic Grant Management System to exchange, execute, and verify legally binding grant contract documents and grant award reports. Such use shall be in accordance with CPRIT's electronic signature policy as set forth in [chapter 701, section 701.25](#).

Texas law specifies several components that must be addressed by the award contract, including needed compliance and assurance documentation, budgetary review, progress and fiscal monitoring, and terms relating to revenue sharing and intellectual property rights. These contract provisions are specified in CPRIT's administrative rules, which are available at <http://www.cprit.texas.gov>. Applicants are advised to review CPRIT's administrative rules related to contractual requirements associated with CPRIT grant awards and limitations related to the use of CPRIT grant awards as set forth in [chapter 703, sections 703.10, 703.12](#).

Prior to disbursement of grant award funds, the grant recipient organization must demonstrate that it has adopted and enforces a tobacco-free workplace policy consistent with the requirements set forth in CPRIT's Administrative Rules, [chapter 703, section 703.20](#).

CPRIT requires the PD of the award to submit quarterly, annual, and final progress reports. These reports summarize the progress made toward project goals and address plans for the upcoming year and performance during the previous year(s). In addition, quarterly fiscal

reporting and reporting on selected metrics will be required per the instructions to award recipients. Failure to provide timely and complete reports may waive reimbursement of grant award costs and may result in the termination of the award contract.

7. CONTACT INFORMATION

7.1. HelpDesk

HelpDesk support is available for questions regarding user registration and online submission of applications. Queries submitted via email will be answered within 1 business day. HelpDesk staff are not in a position to answer questions regarding the scope and focus of applications. Before contacting the HelpDesk, please refer to the *Instructions for Applicants* document (posted on December 1, 2016), which provides a step-by-step guide to using CARS.

Hours of operation: Monday through Friday, 8 AM to 6 PM central time

Tel: 866-941-7146

Email: Help@CPRITGrants.org

7.2. Program Questions

Questions regarding the CPRIT Prevention Program, including questions regarding this or any other funding opportunity, should be directed to the CPRIT Prevention Program Office.

Tel: 512-305-8417

Email: Help@CPRITGrants.org

Website: www.cprit.texas.gov

8. WEBINAR TO ANSWER APPLICANT QUESTIONS

CPRIT will host a webinar to provide an overview of this RFA and a demonstration of CARS. A programmatic and technical question-and-answer session will be included. Applicants should sign up for CPRIT's electronic mailing list at <http://www.cprit.texas.gov/about-cprit/newsletter> to ensure that they receive notification of this webinar.

APPENDIX A: KEY TERMS

- **Activities:** A listing of the “who, what, when, where, and how” for each objective that will be accomplished
- **Capacity Building:** Any activity (eg, training, identification of alternative resources, building internal assets) that builds durable resources and enables the grantee’s setting or community to continue the delivery of some or all components of the evidence-based intervention
- **Clinical Services:** Number of clinical services such as screenings, diagnostic tests, vaccinations, counseling sessions, or other evidence-based preventive services delivered by a health care practitioner in an office, clinic, or health care system (Other examples include genetic testing or assessments, physical rehabilitation, tobacco cessation counseling or nicotine replacement therapy, case management, primary prevention clinical assessments, and family history screening.)
- **Education Services:** Number of evidence-based, culturally appropriate cancer prevention and control education and outreach services delivered to the public and to health care professionals (Examples include education or training sessions [group or individual], focus groups, and knowledge assessments.)
- **Evidence-Based Program:** A program that is validated by some form of documented research or applied evidence (CPRIT’s website provides links to resources for evidence-based strategies, programs, and clinical recommendations for cancer prevention and control. To access this information, visit <http://www.cprit.texas.gov/prevention/resources-for-cancer-prevention-and-control>).
- **Goals:** Broad statements of general purpose to guide planning (Outcome goals should be few in number and focus on aspects of highest importance to the project.)
- **Integration:** The extent the evidence-based intervention is integrated within the culture of the grantee’s setting or community through policies and practice.
- **Navigation Services:** Number of unique activities/services that offer assistance to help overcome health care system barriers in a timely and informative manner and facilitate cancer screening and diagnosis to improve health care access and outcomes (Examples include patient reminders, transportation assistance, and appointment scheduling assistance.)

- **Objectives:** Specific, **measurable**, actionable, realistic, and timely projections for outcomes, for example: “Increase screening service provision in X population from Y% to Z% by 20xx” (Baseline data for the priority population must be included as part of each objective.)
- **People Reached (Indirect contact):** Number of members of the public and/or professionals reached via indirect noninteractive public or professional education and outreach activities, such as mass media efforts, brochure distribution, public service announcements, newsletters, and journals (This category includes individuals who would be reached through activities that are directly funded by CPRIT as well as individuals who would be reached through activities that occur as a direct consequence of the CPRIT-funded project’s leveraging of other resources/funding to implement the CPRIT-funded project.)
- **People Served (Direct contact):** Number of services delivered to members of the public and/or professionals—direct, interactive public or professional education, outreach, training, navigation service, or clinical service, such as live educational and/or training sessions, vaccine administration, screening, diagnostics, case management/navigation services, and physician consults. One individual may receive multiple services (This category includes individuals who would be served through activities that are directly funded by CPRIT as well as individuals who would be served through activities that occur as a direct consequence of the CPRIT-funded project’s leveraging of other resources/funding to implement the CPRIT-funded.)

APPENDIX B: WRITING GOALS AND OBJECTIVES

Adapted with permission from Appalachia Community Cancer Network, NIH Grant U54 CA 153604

Develop well-defined goals and objectives

Goals provide a roadmap or plan for where a group wants to go. Goals can be long term (over several years) or short term (over several months). Goals should be based on needs of the community and evidence-based data.

Goals should be:

- Believable – situations or conditions that the group believes can be achieved
- Attainable – possible within a designated time
- Tangible – capable of being understood or realized
- On a Timetable – with a completion date
- Win-Win – beneficial to individual members and the coalition

Objectives are measurable steps toward achieving the goal. They are clear statements of specific activities required to achieve the goal. The best objectives have several characteristics in common – S.M.A.R.T. + C:

- Specific – they tell how much (number or percent), who (participants), what (action or activity), and by when (date)
 - Example: 115 uninsured individuals age 50 and older will complete colorectal cancer screening by March 31, 2018.
- Measurable – specific measures that can be collected, detected, or obtained to determine successful attainment of the objective
 - Example: How many screened at an event? How many completed pre/post assessment?
- Achievable – not only are the objectives themselves possible, it is likely that your organization will be able to accomplish them
- Relevant to the mission – your organization has a clear understanding of how these objectives fit in with the overall vision and mission of the group
- Timed – developing a timeline is important for when your task will be achieved

- Challenging – objectives should stretch the group to aim on significant improvements that are important to members of the community

Evaluate and refine your objectives

Review your developed objectives and determine the type and level of each using the following information:

There are 2 types of objectives:

- Outcome objectives – measure the “what” of a program; should be in the Goals and Objectives form (see [section 4.4.2](#)).
- Process objectives – measure the “how” of a program; should be in the project plan only (see [section 4.4.4](#)).

There are 3 levels of objectives:

- Community-level – objectives measure the planned community change
- Program impact – objectives measure the impact the program will have on a specific group of people
- Individual – objectives measures participant changes resulting from a specific program, using these factors:
 - Knowledge – understanding (know screening guidelines; recall the number to call for screening)
 - Attitudes – feeling about something (will consider secondhand smoke dangerous; believe eating 5 or more fruits and vegetable is important)
 - Skills – the ability to do something (complete fecal occult blood test)
 - Intentions – regarding plan for future behavior (will agree to talk to the doctor, will plan to schedule a Pap test)
 - Behaviors (past or current) – to act in a particular way (will exercise 30+ minutes a day, will have a mammogram)

Well-defined outcome goals and objectives can be used to track, measure, and report progress toward achievement.

	Outcome – Use in Goals and Objectives	Process –Use in Project Plan only
Community-level	<p>WHAT will change in a community</p> <p><i>Example: As a result of CPRIT funding, FIT (fecal immunochemical tests) will be</i></p>	<p>HOW the community change will come about</p> <p><i>Example: Contracts will be signed with participating local providers to enable</i></p>

ARCHIVE

Summary Table

	<i>available to 1,500 uninsured individuals age 50 and over through 10 participating local clinics and doctors.</i>	<i>uninsured individuals over age 50 have access to free colorectal cancer screening in their communities.</i>
Program impact	<p>WHAT will change in the target group as a result of a particular program</p> <p><i>Example: As a result of this project, 200 uninsured women between 40 and 49 will receive free breast and cervical cancer screening.</i></p>	<p>HOW the program will be implemented to affect change in a group/population</p> <p><i>Example: 2,000 female clients, between 40 and 49, will receive a letter inviting them to participate in breast and cervical cancer screening.</i></p>
Individual	<p>WHAT an individual will learn as a result of a particular program, or WHAT change an individual will make as a result of a particular program</p> <p><i>Example: As a result of one to one education of 500 individuals, at least 20% of participants will participate in a smoking cessation program to quit smoking.</i></p>	<p>HOW the program will be implemented to affect change in an individual's knowledge or actions</p> <p><i>Example: As a result of one-to-one counseling, all participants will identify at least 1 smoking cessation service and 1 smoking cessation aid.</i></p>
